

Event: FITC Toronto 2016

Presentation: Workshop - Physical Computing for Web Developers

Speaker(s): Jean-Philippe Côté

Attendance: 23

Question	Rating out of 10	# of ratings:
Was the speaker knowledgeable on the topic presented?	9.50	6
Did the session meet your expectations?	9.67	6
Did the speaker present the material in a clear and well-organized way?	9.17	6
Please rate the overall effectiveness of the speaker:	9.17	6
This session will affect the way I work:	9.50	6
Overall Average Rating	9.40	6

Comments:

Excellent workshop, topic, and presenter. I learned a lot and really enjoyed the day.

One of the top 10 workshops I have ever attended. JP is a true top notch pro. His 2 Dev helpers made this run smoothly. Do this again!

Great workshop! Learned a great deal in a short amount of time.

An excellent introduction to the world of physical computing through a Web Developer's lens. Projects were fun and the workshop coordinators were helpful in providing assistance when any obstacles were encountered (there were a few). As a popular workshop, the room was full yet I would have preferred more desktop space for experimenting with the Arduino.

Très bien la présence d'assistants pour nous prendre en charge en cas de problème technique. Cela a permis de garder un excellent rythme à la session.

Great workshop! Opened up a whole new avenue for creativity and innovation.
